The Art of Heating

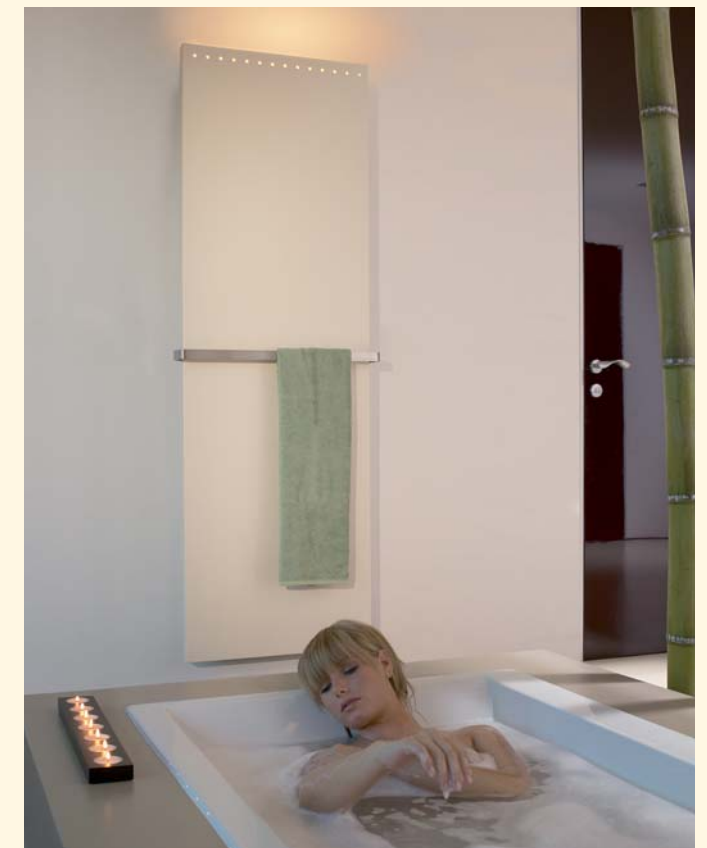

4110: Pure-art/cacao dark

4110\_3: Pure-art/cacao dark

4108\_1: Pure-art/alabaster matt

Reduction to the essential has always been a challenge for designers. The pure function of heating via ceramic surfaces and focussing on the essential – the incomparable radiated heat of ceramic – the clarity of ceramic surfaces with accents set by light - Pure-art by Sommerhuber.

# The Art of Purity

4111: Pure-art/solnhofen

4112\_2: Pure-art/ochre medium

4112: Pure-art/ochre medium

The radiated heat of ceramic closely corresponds to that of the sun. Therefore the heat from Sommerhuber designer ceramic heaters feels natural and particularly comfortable. The colours emphasize the natural constituents of ceramic.

4034: Vision/white

4032: Loft/graphite

4095: Loft/cacao dark

4031: Loft/corn

The wide selection of colours and shapes of the ceramic heating objects by Sommerhuber allow individual matching with personal furnishing styles. Whether as a counterpoint or in complete harmony with the furnishings- in the bathroom, in the hall or living room - designer heaters that are a joy to look at.

Acrylic lamp with Glass cover

4030\_9: Metal base

4030\_8: Ceramic cornice

4030\_10: Granite base

In antiquity, columns played an important role in architecture. Sommerhuber had the idea of combining the classical elements with a ceramic heat source. Additional functions such as lighting, room division and shelves make the columns into beautiful, but in particular practical design objects.

4077: Contur/graphite

4096: Contur/white

4097: Contur/lava

4042: Vision/saffron

4061: Contur/white

4107: Contur/offwhite

4019: Contur/alabaster

4093: Loft/white

4042\_3: Loft/corn

It is always the first moment that determines how comfortable one feels, how friendly the welcome is, and how pleasant it is to come home. It is the little things, of which we are not conscious, that make all the difference. The designer heaters by Sommerhuber make an important contribution to pleasant reception with their ceramic radiated heat.

# The Art of Welcoming

4094: Spacey/lava

4094\_1: Spacey/lava

4106: Spacey/white

The thought of touching a body with a silky-soft surface and feeling the pleasant heat, is a unique feeling that deeply moves us. It is so familiar to us that we are able to let go and relax. Ceramic surfaces create this feeling in a unique way – enjoy the stimulating feeling of cosy warmth.

# The Art of Touch

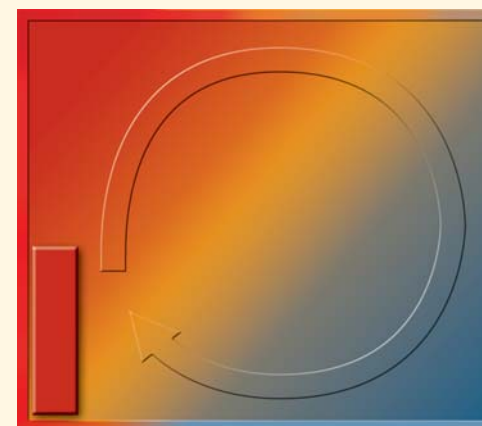

4037: Plane-art/white

4076: Plane-art/saffron and slate

## LIVING ATMOSPHERE THROUGH CERAMIC RADIATED HEAT

Metal heaters largely create convected heat. With convected heat primarily the air is heated, thereby a permanent air current is created. Surfaces in this environment remain cool.

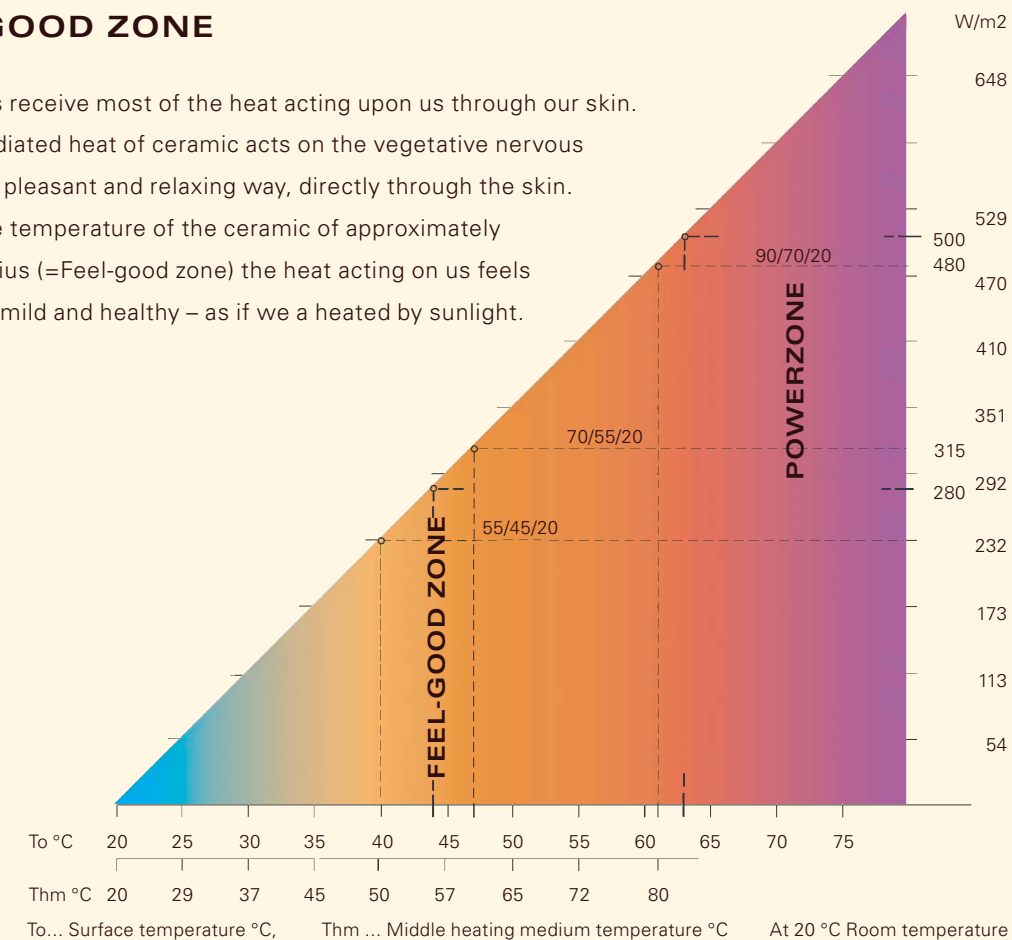

Ceramic heaters largely create radiated heat. Radiated heat evenly warms persons and objects, as well as surfaces in this environment.

4075: Plane-art/white and black

## FEEL-GOOD ZONE

We humans receive most of the heat acting upon us through our skin. The mild radiated heat of ceramic acts on the vegetative nervous system in a pleasant and relaxing way, directly through the skin. At a surface temperature of the ceramic of approximately 40-45° Celsius (=Feel-good zone) the heat acting on us feels particularly mild and healthy – as if we are heated by sunlight.

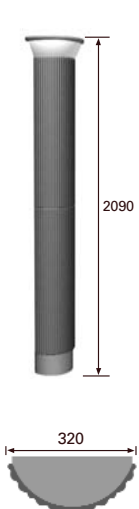

In living areas the ceramic designer heaters by Sommerhuber are particularly enjoyable. The “Aura” of the combination of design and comfortable heat create a unique atmosphere for living. The radiated heat of ceramic does not dry out the air and does not create air currents. Therefore, we find the atmosphere produced comfortable and we feel good.

MODEL OVERVIEW

**CONTUR QUADRAT**

- Format:
  - Height: 2090
  - Width: 320
  - Depth: 140
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting: Metal-, Ceramic-, or Acrylic lamp
- Accessories: Towel holder, Hooks, Glass, Wooden shelf

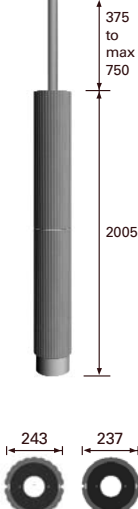

**CONTUR GROOVE\*)**

- Format:
  - Height: 2090
  - Width: 320
  - Depth: 140
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- \*) nicht in Strukturglasuren
- Lighting: Metal-, Ceramic-, or Acrylic lamp
- Accessories: Towel holder, Hooks, Glass, Wooden shelf

**CONTUR SMOOTH**

- Format:
  - Height: 2090
  - Width: 320
  - Depth: 140
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting: Metal-, Ceramic-, or Acrylic lamp
- Accessories: Towel holder, Hooks, Glass, Wooden shelf

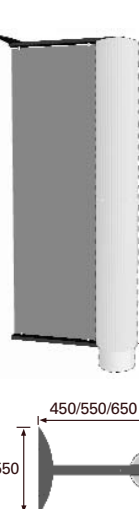

**LOFT - B GROOVE\*) OR SMOOTH**

- Format:
  - Height: 2005
  - Ø: 243 or 237
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- \*) not in structured glazes
- Lighting: Acrylic lamp
- Accessories: Towel holder, Hooks, Glass, Wooden shelf

**VISION - SMOOTH**

- Format:
  - Height: 2005
  - Width: 277
  - Depth: 170
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting: Acrylic lamp
- Accessories: Towel holder, Hooks, Glass, Wooden shelf

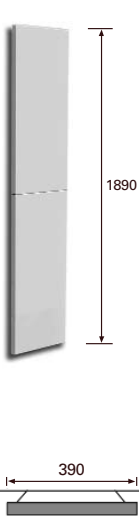

**ROOM DIVIDER GLASS**

- Format:
  - Width: 350/450/550
  - Height: 1840

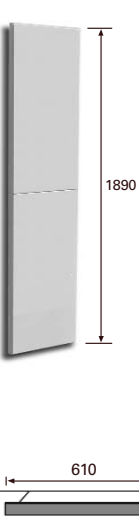

**ROOM DIVIDER COAT RACK**

- Format:
  - Width: 350/450/550
  - Height: 1840

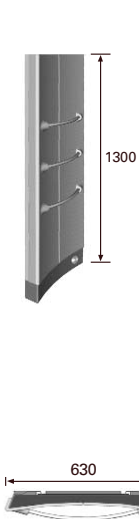

**PURE-ART - A SMOOTH**

- Format:
  - Height: 1890
  - Width: 390
  - Depth: 115
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting:
  - Light up
  - Light forwards and up
- Accessories: Towel holder

**PURE-ART - B SMOOTH**

- Format:
  - Height: 1890
  - Width: 610
  - Depth: 115
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting:
  - Light up
  - Light forwards and up
- Accessories: Towel holder

**SPACEY SMOOTH**

- Format:
  - Height: 1300
  - Width: 630
  - Depth: 125
- Heatable:
  - Water: ✓
  - Electricity: ✓
  - Water and Electricity: ✓
- All Glazes: ✓
- Lighting: –
- Accessories: –

HEATING TECHNOLOGY

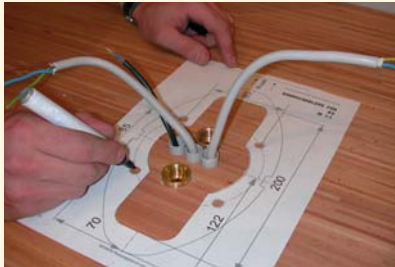

- Heated with
- water via central heating (separate heating circuit recommended)
  - Electricity
  - Combination of water und electricity

ASSEMBLY

Cool Heat objects are delivered pre-fabricated and can therefore be assembled quickly and cleanly in approx. 2 hours. The entire connection technology (water and electricity) is easily accessible, behind the removable base.
